

National Information Security Conference Programme

Wednesday 13th June, 2012

(Subject to Change)

11.30 Registration Desk (11.30 – 16.30)

12.00 Pre-Conference Events

14.00 The Diminishing Network Perimeter – A RANT

to Alan Moffat, Chairman of the Scottish Information Assurance Forum and Director at RSC2 Solutions

16.00

This session is hosted by the Scottish Information Assurance Forum (SIAF). However, all delegates are invited to join the pre-conference event. The June SIAF meeting will continue with the theme of *The Diminishing Network Perimeter*. Four solution providers will be invited along to have a RANT about topical infosec issues and SIAF attendees will have the opportunity to engage in a lively debate.

SIAF is committed to improving information security across organisations within Scotland. The forum consists of members from both the public and private sectors who are dedicated in improving awareness and developing best practice. This meeting will be free to attend.

One Year On...

What's happened in a year?

Last year we listened to presentations from Gerry O'Neill and Mike Humphrey. Now, one year on, we are delighted to welcome Mike and Gerry back to find out what's happening in the Cloud and if users are reporting incidents.

16.00 Information Security Incidents – Are They Reported? If Not, Why Not?

to Mike Humphrey, Head of Information Assurance and Accreditation, Serious Organised Crime Agency (SOCA)

16.30

- Why do people find reporting incidents a challenge?
- What are the barriers and what can be done to overcome them?

19:00 Welcome Dinner: Your Passport to the World of Security

**to
Late**

The welcome dinner will set the theme for the rest of the conference; a relaxed and informal chance to catch up with some of the latest developments amongst security vendors. Dinner will be an informal buffet presented in the exhibition hall, the sponsors will be available on the exhibition stands to demonstrate their current and future products. It will be a chance to catch up with some old friends and maybe make some new ones.

There will be a conference "passport" available to have stamped with vendor visas as you browse and engage with the sponsors. Completed passports can then be submitted at the end of the conference for a prize draw for some excellent prizes.

Thursday 14th June, 2012 - AM

08:00 Registration

09:15 Chairman's Welcome: Alan Moffat

Alan Moffat MBA is the Managing Director of RSC2 Solutions and Founder and Chair of the Scottish Information Assurance Forum. Alan's career spans 30 years in Information Security and 10 years in Management Profiling.

09:30 KEYNOTE Address: TBC

10:05 Vulnerabilities of Communications Devices

John Bayliss, Communications Risk Management

It is generally agreed that education is the most important aspect of protecting your information. Some attacks are almost impossible to mitigate against, so knowing what form an attack might take is critical. With ever-increasing vulnerabilities around communication (Blackberries, mobiles, laptops, Bluetooth, WiFi), keeping your company data secure is critical to your business' survival. How can you ensure that your private commercial information stays just that - Private?

10:40 Visionary Statement: TBC

10:55 Break, Exhibition and Networking

11:30 The Legal Aspects of Cloud Computing

Dai Davis, Technology Lawyer and Chartered Engineer

Is cloud computing for everyone? What are the contractual and legal risks of cloud computing? What are the legal-security implications? How should they be addressed? How can they be minimised and avoided? This workshop examines how cloud computing can be adopted and the dangers avoided on a practical level.

12:05 The Human Factor

Brian Hunter, Information Assurance Manager, Baillie Gifford

You may spend thousands on ensuring that you have the best technical defences against today's cyber attacks, but a good social engineer could breach your security with the unwitting and obliging assistance of your trusted staff members. Using phishing, deception, trickery, scams and maybe even some charm, coupled with a little technical wizardry, you could find the security of your environment compromised. This is a real-life example of what's possible. Artificial intelligence is no match for natural stupidity.

12:40 Visionary Statement: TBC

12.55 Lunch, Exhibition and Networking

14:00 Securing the Mobile Enterprise

Adrian Price, CIO, Ministry of Defence

Synopsis to be agreed.

14:35 The Top Ten Cloud Security Questions to Ask

Mike Small, KuppingerCole

Organisations are moving towards a Cloud model for IT to optimise the procurement of IT services. How does this impact on information security and compliance? The Cloud is not a single model but covers a wide spectrum, the security risks associated with Cloud computing depend upon both the service model and the delivery model adopted. This presentation outlines the risks involved in Cloud Computing and provides ten information security questions that every organisation considering a move to Cloud computing needs to ask.

15:10 Visionary Statement: TBC

15:25 Break, Exhibition and Networking

16:00 Panel Session: The Diminishing Network Perimeter

Chair – Gerry O'Neill

Tony Neate, Managing Director, **Get Safe Online**

John Strange, Deputy Director, **Serious Organised Crime Agency (SOCA)**

Mike Small, Fellow Analyst, **Kuppinger Cole**

Antonios Patrikios, Associate Partner, **Field Fisher Waterhouse**

17:15 Close

19:30 Drinks Reception

Friday 15th June, 2012

(Subject to Change)

08:00 Delegate Networking Breakfast

Breakfast on the last day will be served in the exhibition hall. It will also be your last chance to get your passport stamped and submitted for the grand prize draw.

09:10 Chairman's Opening: Alan Moffat

09:20 KEYNOTE Address: TBC

09:50 Should we still worry about terrorist attacks in the UK, and if so, what form will they take?

Andrew Erving, former Head of Counter-Terrorism Intelligence, GCHQ

Now that Usama bin Ladin and co have been pretty well put out of action what is the present terrorist threat in the UK and elsewhere? What should we be concerned about now, especially in the run-up to London 2012? What can the government and the agencies do both to prevent attacks and, heaven forbid, to deal with the consequences? This session contains the personal impressions of a former practitioner, with experience in the London CT community and central government's COBR.

10:20 The Cost of Cybercrime

Charlie McMurdie, Detective Superintendent, Head of Economic and Cyber Crime at the Met Police

Synopsis to be agreed.

10:50 Break, Exhibition and Networking

11:20 Social media – Information Security Friend or Foe?

Graham McKay, Chief Information Security Officer, DC Thomson & Co Ltd

Graham takes you on a social media journey including the good, bad and ugly of social media from his companies perspective. Tips and tricks a plenty as well as advice on policy and strategy.

11:50 The Cyber Security Challenge

Duncan Hine, CEO, Cyber Security Challenge UK

The Cyber Security Challenge is a series of national online games and competitions that will test the cyber security abilities of individuals and teams from every walk of life. It is designed to excite and inspire anyone considering a career in the cyber security industry. Duncan will use this session to discuss the impact of the Cyber Security Challenge on the industry.

12:20 A Practical Way to Reduce Mobile Device Security Threats

Tony Neate, Get Safe Online

Synopsis to be agreed.

12:50 Chairman's Closing Words

13:00 Close and Lunch
